

VENKATESWARLU KOMMINENI

Sonipat, Delhi NCR | (+91) 9100873719 | komminenivenkatesh045@gmail.com | github.com/kommeninivenkatesh

SUMMARY

Curious and motivated CS undergraduate proficient in full-stack engineering and practical AI solutions. Combines sharp analytical thinking and consistency with strong interpersonal skills, eager to contribute effectively within cross-functional teams.

TECHNICAL SKILLS

Programming:	Python, C
Web Technologies:	HTML, CSS, JavaScript
Frameworks:	React, Node.js, Express.js, Three.js, TensorFlow, OpenCV
Tools & Databases:	MongoDB, MySQL, Git, GitHub
Core Focus:	Full-Stack Web Development, Software Engineering, Artificial Intelligence

INTERNSHIP EXPERIENCE

Full-Stack Web Development Intern

March 2026 – April 2026 | Remote

Sysslan IT Solutions

- Gained hands-on experience in full-stack web application development, building interactive UI components and integrating backend APIs.

PROJECTS

Financial Planning Platform [MERN Stack, Three.js]

<https://github.com/kommeninivenkatesh/e-commerce-website>

- Architected a full-stack wealth-tracking application rendering premium, interactive 3D visualizations for long-term investment portfolios.
- Engineered live asset-management dashboards enabling users to track, monitor, and calculate dynamic financial performance parameters.

Vahan Bazar (Two-Wheeler Marketplace) [MERN Stack, MongoDB]

<https://github.com/kommeninivenkatesh/vahan-bhazar>

- Developed a production-ready, full-stack digital marketplace dedicated to high-volume inventory operations for pre-owned two-wheelers.
- Optimized backend aggregation logic and complex database queries to maximize search speed and lower discovery latency over large-scale listings.

Brain Tumor Detection AI [Python, TensorFlow]

https://github.com/kommeninivenkatesh/Brain-tumor-detection-using-ML_model

- Designed and trained a deep Convolutional Neural Network (CNN) architecture optimized for computer-aided clinical diagnostics.
- Implemented image augmentation and structured preprocessing arrays to consistently identify and classify irregularities across complex MRI scans.

Indian Sign Language Recognition [Python, OpenCV]

<https://github.com/kommeninivenkatesh/Real-Time-Indian-Sign-Language-Emotion-Recognition-System>

- Engineered a highly responsive, real-time computer vision processing stream designed to convert continuous manual gestures into text strings instantly.
- Deployed precise visual geometric matrices and localized frame bounding to guarantee dependable sign recognition for inclusive communication.

EDUCATION

SRM University

Aug 2023 – July 2027

B.Tech in Computer Science & Engineering (Specialization: Data Science and AI)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), MongoDB, Machine Learning.

CERTIFICATIONS

- Machine Learning Professional Certificate** — Issued by IBM
- Data Science Methodologies Certificate** — Issued by IBM
- Introduction to Python Certificate** — Issued by IBM
